

## Slip prevention made easy

You can now protect your business from the cost of slipping accidents and slipping injuries. Slip injuries cause 10,000+ major injuries each year and slipping incidents may be costing your business. Recent advances in floor testing and slip prevention make it much easier to monitor and manage slip risks across your business.

## Proactive steps reduce slip risks

- The 3-layer model: understanding how and why slipping incidents occur
- Slip risk assessment – comprehensive guide to conducting a slip risk audits in your business
- A professional approach to managing slip risk and best practice from around the world

## Benefits for your business

- Framework for monitoring and managing slip risk and protecting staff and customers from slip risks
- Improvements on floor cleaning, flooring maintenance alongside improved safety and reduced costs
- Proactive demonstration of due diligence and a robust way to prevent or defend against slip claims
